

1. Name of Independent variable:
    a. Mother weight
2. Name of dependent variable
    a. Birth weight
3. β0 value (intercept)
    a. 2369.6235
4. β1 value (slope coefficient)
    a. 4.4291
5. R^2 value
    a. 0.034
6. 1 sentence explanation describing the relationship between the variables in context
    a. The variables between the mother weight and birth weight show little correlation based on results shown above

7. Name of Independent variable:
    a. Population
8. Name of dependent variable
    a. Housing insecurity
9. β0 value (intercept)
    a. 10.6677
10. β1 value (slope coefficient)
    a. -0.0020
11. R^2 value
    a. 0.016
12. 1 sentence explanation describing the relationship between the variables in context
    a. The graphs above highlight a weak negative correlation between the population and housing insecurity

13. Name of Independent variable:
    a. Obesity
14. Name of dependent variable
    a. Mental health disorder
15. β0 value (intercept)
    a. 9.3830
16. β1 value (slope coefficient)
    a. 0.2069
17. R^2 value
    a. 0.242
18. 1 sentence explanation describing the relationship between the variables in context
    a. The two graphs above show a strong positive correlation between mental health disorders and obesity.
